

# at home MOVING OUT CHECKLIST

## On the day of your move...

- Show the removers around, make them a cup of tea and explain what's staying and what's going, and if there's anything delicate or needing special care.
- Once the van's loaded, check the property to make sure everything is packed
- Make sure all windows and doors are locked and the lights, boiler etc are switched off.
- Take final meter readings as agreed by utilities companies.
- Handover keys if arranged for that day.
- At the new property, get your "moving kit" out and make everyone some refreshments
- Show the removers around the new place and make sure everyone knows which room is which.
- Do one last check of the van once everything's unpacked.
- Once in your new home, make up the beds and unpack the bed linen first. That way you can crash out whenever you want to if it all gets too much; the rest can wait!
